Class Rule changes

- Rule 87 – Need wording for exceptions-tabled
- Asymmetrical Sails – review changes from January meeting-tabled
- Attachment of pole to mast – Glanville - tabled
- Revise class rules to allow specific design exceptions relative to canting keels – class rules should read as follows:  
 “Canting keels and center boards moved by the use of stored energy are allowed if the boat retains self righting ability with the keel or centerboard in any allowed position. This changes RRS 51 and RRS 52 to allow use of stored energy to move a swing or canting keel (dead weight) or centerboard for stability on a boat that has been designed for use of this appendage. Specifically this rule change only pertains to the Farr 11S and the Schock 40

Committee approved purchase of small projector for use at meetings – Bill Kellner to find a projector for \$500-\$600.
